EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Pursuant to MPEP § 606.01, the title has been changed to --DISC DEVICE WITH TRANSPORT ROLLER BRACKET RESTRAINING DETECTION PROTRUSIONS AWAY FROM OUTER PERIPHERAL EDGE OF DISC--.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither shows nor suggests a restraining section disposed at a roller supporting member, wherein when a transport roller moves to the retreat position, a detection section is restrained by being moved in a predetermined direction by the restraining section, and a movement of the detection section when restraining the detection section is transmitted to a positioning member through the transmitting member, so that the positioning member moves so as to separate from an outer peripheral edge of a disc.

Although Yabushita (US PAP No. 2002/0001280 A1) shows roller control plate 470 (see Fig. 15) controlling both a swing support plate 320 of pull-in roller 310, and a centering member (3901, for example, which functions as both detection section and positioning member), the reference neither shows nor suggests that the detection section is restrained by being moved in a predetermined direction by the restraining section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
